STREAM-3 FURNITURE
SERIES

STREAM-3 Series Suspended System has been designed for the laboratory that requires hygiene and constant cleaning. Cabinets are suspended underneath the worktop rather than resting on the floor, allowing easy cleaning underneath each unit

STREAM - 3

Each cabinet is mounted to a C-type or O-type frame system.

Sliding version of cabinets on the frames are available upon request.

Free space between cabinet and floor that makes floor cleaning process a lot easier

BONLAB STREAM- 3 series is the ideal solution for hospitals or infection control laboratories where it is essential that dirt, dust and other contaminants do not collect around and underneath laboratory furniture.

Our team's full experience has been applied to our benching systems - engineered to meet the demanding specifications of modern laboratories in all sectors.
